#### APCC2 Collapsible

12.5 x 11.0 cm

The flexible connector (APCC2) is extendable from 22.5 to 55.0 cm and is very useful when the SWR pipework is at a significant distance from the WC spigot outlet or if it is in a vertical position.

## Active Drainage Ventilation System

Studor P.A.P.A. (Positive Air Pressure Attenuator) and Studor Air Admittance Valves (AAVs) provide a complete Active Drainage Ventilation solution, which is particularly suited to high-rise applications.

An active ventilated system provides relief at the Point-Of-Need (PON) by removing or attenuating an incoming pressure transient that, if left, could lead to trap depletion.

The combination of the P.A.P.A., Maxi-Vent and Mini-Vent AAVs support a complete system to limit pressure fluctuations, guaranteeing the integrity of the traps.
